Updated Blocked Application content, ***DENY-msscctr32*** has been made available on the LANDesk global host servers for customers to download.

According to SecureWorks, the Asprox botnet, once used solely to send out phishing e-mails, is pushing the tool out to systems in its network via a binary with the file name **msscctr32.exe**. The executable is installed as a system service with the

name
"Microsoft
Security
Center
Extension."
