

Vulnerability in Intel QIP Service

Problem:

A vulnerability in the Intel QIP Service could allow remote code execution. This vulnerability affects LANDesk Management Suite, LANDesk Security Suite, and LANDesk Server Manager 8.8 and earlier.

FIX:

LANDesk has released fixes for versions 8.7 & 8.8 or the above mentioned products. If you are using a version less than these two please upgrade to the latest version to avoid this vulnerability.

For 8.7 Download [SWD-1620987.5](#)

For 8.8 Download [SWD-1620988.2](#)

CVE ID:

CVE-2008-2468

Special note:

LANDesk would like to thank TippingPoint and Aaron Portnoy for reporting this issue.
